

MAHALALIL P. VILLAFLORES

Aspiring Full-Stack Web Developer

Kawayan, Biliran, Philippines • mahalalilvillaflores@gmail.com • github.com/mahalalilvillaflores-jpg • linkedin.com/in/mahalalil-villaflores-7a5136265

PROFESSIONAL SUMMARY

Fourth-year Computer Science student with hands-on project experience developing web and mobile applications. Skilled in React, JavaScript, Node.js, Express, and MongoDB. Developed PrintDayon, an online printing services platform combining shop recommendations, shortest-path routing, and real-time queue tracking. Seeking opportunities to contribute to practical software projects and grow as a full-stack web developer.

TECHNICAL SKILLS

Frontend: JavaScript (ES6+), React, HTML5, CSS3, Tailwind CSS, Vite

Mobile Development: Dart, Flutter

Backend: Node.js, Express, PHP, Python, REST APIs, Socket.IO

Databases: MongoDB, Firebase, MySQL (introductory), PostgreSQL (introductory)

Database Tools: Mongoose

Development Tools: Git, GitHub, Visual Studio Code, Antigravity IDE

Deployment: Cloudflare Pages, Render, Railway

Additional Skills: Graphic Design, CRUD Development, Dijkstra’s Algorithm, Haversine Formula, First-Come, First-Served (FCFS) Scheduling

PROJECT EXPERIENCE

PrintDayon — Online Printing Services with Spatial Routing and Queue Optimization **Full-Stack Developer**

Technologies: React, Vite, Tailwind CSS, Node.js, Express, MongoDB, Socket.IO, MapLibre GL

- Developed the frontend, backend, and database integration for a printing services platform serving customers and printing shops in Naval, Biliran.
- Implemented shop recommendations based on estimated completion time, combining travel time, queue waiting time, and printing duration.
- Used Dijkstra's algorithm for shortest-path routing and the Haversine formula for geographic distance calculations.
- Built real-time order status updates and queue tracking using Socket.IO.
- Integrated MapLibre GL to display printing shop locations and routes.
- Deployed the frontend on Cloudflare Pages and the backend on Render.

Roasted Route — Online Food Ordering Platform **Developer**

Technologies: Python, HTML5, CSS3, Render

- Developed a web application for a local roasted chicken business with customer registration, menu browsing, and order submission.
- Deployed the application on Render.

Room Management System **Developer**

Technologies: PHP, MySQL, HTML, CSS

- Built a web application for creating, viewing, updating, and deleting room records.
- Connected the application to a MySQL database for room information storage and retrieval.

Rent Tracker — Mobile Rental Management Application **Developer**

Technologies: Dart, Flutter, Firebase

- Developed a mobile application for recording tenant information and tracking rental payments.
- Integrated Firebase to store and synchronize tenant and payment records.

Task Queuer — CPU Scheduling Application **Developer**

Technology: Python

- Developed an application demonstrating First-Come, First-Served process scheduling.
- Implemented process execution sequencing and calculations for waiting time and turnaround time.

EDUCATION

Bachelor of Science in Computer Science **Fourth-Year Student**

Biliran Province State University • Naval, Biliran, Philippines

CERTIFICATIONS & CREDENTIALS

Introduction to AI Literacy and Responsible Use **September 2026**

Commission on Higher Education (CHED) • Mapúa University (Credential ID: 6YOR8GAQ9BAGM)

Networking Basics **May 2026**

Cisco Networking Academy (Cert ID: b8c22e7f-33af-497a-9d76-5b63e6bcc408)
